Allowable Subject Matter

Claims 1-21 are allowed.

As to claim 1, the prior art of record, taken alone or in combination, fails to disclose or render obvious the use of an optical subsystem in a reticle inspection system that produces an aerial image of a reticle by simulating dose as a function of position such that the aerial image is substantially equivalent to an image of the reticle that would be projected into the resist, in combination with the rest of the limitations of claim 1.

As to claim 15, the prior art of record, taken alone or in combination, fails to disclose or render obvious an optical subsystem configured to alter one or more properties of light transmitted by a reticle and to project the light onto a detector configured to produce an aerial image of the reticle in a reticle inspection system, in combination with the rest of the limitations of claim 15.

As to claim 19, the prior art of record, taken alone or in combination, fails to disclose or render obvious an optical subsystem in a reticle inspection system that forms an intermediate aerial image with a numerical aperture approximately equal to a numerical aperture at which the exposure system projects the image into the resist and projecting the intermediate aerial image into a detector, in combination with the rest of the limitations of claim 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
